Will	The County has received 53 special use permit applications for solar projects. Eight (8) projects were withdrawn. Three (3) projects have been denied by the Will County Board. Six (6) projects have not been heard by the Will County Board at the time this email was sent. The total number of Will County Board approved special use permits is 36. Thirteen (13) of those 36 special use permits are now void. That means that there are only 23 valid special use permits at the time this email was sent. The County of Will has not received any wind project applications.	The total acreage for all submitted activity is 1,463.74. However, several projects are now void due to the expiration of their special use permit. The total number of acres that currently have a valid special use permit is 579.17-acres. That puts the average acreage of approved (and valid) projects at 25.18-acres.	3	6	There are 188.11-acres of projects under consideration.	The remaining six (6) projects appear to be on leased land.	The County Board did not deny any project prior to the new legislation (effective early 2023). The County Board had approved 27 projects prior to the new legislation.	The County Board has denied three (3) projects since the passage of the new legislation (effective early 2023). The County Board has approved nine (9) projects since the passage of the new legislation.
